Dear Umer,

I want to confirm that the following four team members are working with our organization on their FYP from NUTECH University.

- MuhammadAbdullah Khurram
- MuhammadAmanArshad
- MuhammadSaadAhmed
- MuhammadUmerQuresh

Project Scope:

The project aims to revolutionize the Shopify shopping experience through a Virtual Try-On (VTON) application enhanced with Augmented Reality (AR) features. This app will empower customers to visualize clothing and accessories in real time, allowing them to see how items look and fit before purchase. We expect to minimize return rates and boost customer confidence by reducing uncertainty and enhancing personalization.

Deliverables:

- Frontend & Backend Development
- Robust and responsive application design, integrating a user-friendly interface with a secure backend.
- AI and AR Model Development
- Cutting-edge AR and AI models are designed for realistic virtual try-ons and are fine-tuned to traditional and modern clothing styles.
- Shopify Integration and App Store Deployment
- Seamless integration with Shopify, meeting app store guidelines for efficient deployment and accessibility to merchants

--

Best Regards,

Zulqarnain Hashmi
Executive Director
